Printing and Use Recommendations

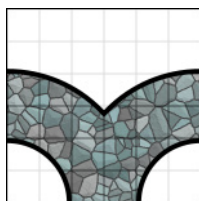

1. Turn off **Print to Fit Page** and set **Print Scaling** to *None*; otherwise the grid squares will be slightly below 1 inch.
2. Duplex print, which will automatically label each tile with the name of the set and tile number for later reference. The extra time you may spend duplexing is saved in sorting and organizing later.
3. Print the thumbnail pages and write the number of each tile you have printed on the line next to the tile name. This will help you in planning and assembling more complex layouts in the future.
4. Laminate each tile before cutting it out. The added durability saves you money in reprinting costs and gives the extra benefit of allowing wet and dry erase markers to both write on and wipe off of your tiles.
5. To minimize tiles sliding around during play, assemble tiles atop a non-slip rug pad.
