

Thank you for your interest in another fine Emerald Giant product.

The lists in this document were generated by the Dungeon Crawler computer program. If you happened to purchase this reasonably priced software, you could generate an endless supply of such items. New material is being added all the time. Enough advertising.

Great effort has been taken to make sure the results are useful, interesting and fun. Recognizing the limits of computer-generated descriptions, I expect you will find entries that don't work for you. Some will be too silly or too serious for your taste. Whatever. In actual use, I tend to generate a cluster of items and pick the one I like best at a given moment—something that fits the mood of the game. I'm sure you'll do the same.

Also, some of the lists Emerald Giant has made available are humorous by their very nature. Passwords and Tavern Diversions are good examples. There are many I would never use in a serious role-playing session, but I hope you find them hilarious and well worth the price of admission.

Enjoy.
