Modern Floor Plans Series – 1 Inch Grid  
Warehouse – 1 Floor (BFG\_Warehouse\_1Floor\_001)

**Modern Floor Plans – Warehouse – 1 Floor – 001** consists of ten 8x10 tiles for use with miniatures or table top RPG games utilizing a 1 inch grid.

This product is intended as a gaming supplement only and does not accurately depict a scale drawing for construction or design purposes. Liberties are taken to fit content into one-inch grid patterns.

The product includes fixtures, such as sinks, stoves, toilets, and showers, but it does not place most other furniture. This allows the GM to determine the purpose of each room as well as re-use maps with different setups.

## Printing and Use Recommendations

- ❖ Turn off **Print to Fit Page** to preserve proper scale.
- ❖ Duplex this product so that the label pages print on the back of your tiles. This makes the product easier to assemble and sort out when mixed with other similar products.
- ❖ When duplex printed, tabs assist in orienting tiles correctly (tab A on tile 1 should be placed beside tab A on tile 2, and so on).
- ❖ Duplex printing the Legend and Assembled Image pages together gives you a quick reference guide for your map.
- ❖ Lamination is a great way to make your map more durable. It also allows you to use wet or dry erase markers to make additional annotations, mark furniture, and otherwise temporarily customize your map surface.
- ❖ To minimize unwanted movement of map pieces during play, assemble tiles atop a non-slip rug pad.
- ❖ Fixtures – Some fixtures, such as toilets and bathroom sinks should not entirely block movement. Bathrooms are often small and have fixtures in most squares.
- ❖ Half Squares – Some areas, such as closets, are cramped spaces and take up less than a full square. Shelves and contents often prevent entry into a closet. It is up to the GM to determine if a small closet could be entered.
